

## **Human Circuit Joins Professional Systems Network International (PSNI)**

*PSNI Shareholders approve Human Circuit, Inc. for admission into the network covering the Washington D.C. region.*

Gaithersburg, MD ([PRWEB](#)) August 27, 2014 -- Human Circuit, Inc. announced that they have been invited to become a member of Professional Systems Network International. (PSNI)

Professional Systems Network International is a nationwide network of independent audiovisual and unified communication integrators and service providers. Formed in 1986, PSNI brings together selected best-in-class integrators (affiliates) who share a common commitment to ensure the highest standards and integrity of the industry. Ongoing continued education focused on client-centered solutions and best practices ensures PSNI affiliates continue working independently and collectively through the PSNI Enhanced Service Network (ESNet) to deliver an exceptional customer experience, regardless of the location of the client. PSNI affiliates design and implement audiovisual and presentation systems for government, K-12 schools, higher education, corporations, medical, houses of worship, broadcast and cable, digital signage, hospitality, legal and residential.

Bruce Kaufmann, President and CEO of Human Circuit said: "I consider it a real honor to be asked by PSNI for Human Circuit to be a part of their organization. PSNI members are the best design and integration ambassadors of the audiovisual and broadcast industry. To be part of the group is an endorsement of the quality of our people and our company."

"We are pleased to have Bruce Kaufmann and Human Circuit as part of the PSNI network," said Andy Sellers, PSNI President. "The company brings a successful and innovative approach in marketing and delivery to the AV-IT industry that complements all that we at PSNI strive to achieve."

### **About Human Circuit**

Since 1965 Human Circuit has been a company of proven creative thinkers and engineers who are dedicated to providing vital media integration solutions to clients in need of advanced video, audio, data and control systems used in communications, training, broadcast, streaming, and video on demand and presentation applications. With a video and IT-centric engineering core, Human Circuit designs and architects intuitive solutions that are aligned with a company's business objectives, anticipated growth and end-user needs.
