

# OUR DNA

Technology Design and Integration

**HUMAN CIRCUIT**  
CONNECT AND CONQUER

## We are Human Circuit

We are a company of proven creative thinkers who provide integrated technology solutions to clients in need of advanced video, audio, data and control systems. We are the business advantage partner that designs, builds and integrates intelligent, intuitive and insightful solutions that ease the stress of using technology while improving communications, information sharing and collaboration across the enterprise. We are dedicated to providing our clients with sound technology planning and innovative system design vital to their business success. We bridge the gap between those who manufacture the technology and those who need to use it.

## We Deliver Knowledge and Experience

We have been going strong since 1965 and we use our knowledge and experience to design and build integrated technology solutions that deliver a return on investment and reduce total cost of ownership. Our company's longevity is a testament to our understanding of the relationship between an ever changing business environment and the advancement and proliferation of technology. When you put us to work, we combine current technology with our expertise to address your business issues.

## Our Account Managers Work for You

Human Circuit's account managers work hard to understand your business needs and to help you make informed decisions. They are an experienced team of professionals who listen and gather information about your company in order to understand your mission and goals. With this information, our account managers will go to work with the Human Circuit engineering team to develop the best solution for you and your organization.

## Support

We understand that operational support is essential and must match the needs of your organization. That's why we offer customizable support programs that ensure the long-term health of your integrated system and your investment. We believe that limiting downtime is paramount so we offer several support options that are tailored to your specific needs – including remote system monitoring. If an issue calls for on-site service, we also have a staff of trained technicians that are ready to be deployed.
